

Virtual Terminal Desktop Power Harnesses

Overview:

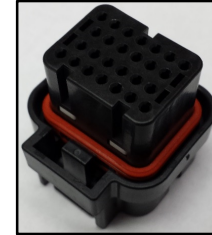

- Allows the virtual terminal to be powered up in the office or home.
- Data can be easily transferred and updates installed without going to the machine.
- Training and demonstrations can be performed on virtual terminal functions.
- Each harness includes a 120V AC to 12V DC power supply that will plug right in to a wall outlet.
- For monitors with no power switch, we have installed one in the cable so that the display can be powered up and shut down properly.
