

GreenStar® Rate Controller Harnesses

Overview:

These harnesses are designed to interface the John Deere® Rate Controller (JDRC) and Rate Controller 2000 (RC2000) to Application Rate/Shutoff Control Components used on NH3 Applicators or Sprayers. These harnesses will have the correct connectors to fit the application without the use of adapter cables or other troublesome connector solutions. If you have a cabling issue that is not shown on this page, give Ag Express Electronics a call and we will discuss and design a cable that will fit and function properly for you!
