

Planter and Drill Harness Adapters

Overview:

Is the harness on the planter you are setting up still in good shape? Using one of the adapters below will add significant cost savings when compared to replacing an entire harness. Ag Express offers several adapters to interface existing harnessing to a new monitor system. This allows quick and easy installation for you and a reduced cost for your customer. If you don't see what you need or if you have any questions, please give us a call!

Description	Connectors Used		Part Number <i>xx = # Of Rows</i>	List Price
	TO MONITOR	TO HARNESS
