

Planter Section Clutch Harnesses and Adapters

Overview:

These harnesses are designed to interface **Implement Section Controllers** from different manufacturers with your customer's third-party planter clutches for automatic swath control. ***These cables can be designed to retrofit any planter with air or electric clutches.*** If you do not see the harness that you need here, give us a call and Ag Express will design a custom harness for your application.

These complete harnesses would be compatible with controllers manufactured by:
John Deere® • Trimble® • Raven™ • Outback® • Ag Leader® • Rinex® • Others
