

Manual Clutch Control Options

Overview:

The Manual Switch Box can be connected to an existing clutch harness for manual control of your sections. Every Switch Box includes a Master Switch, and LED's to indicate which sections are activated. If you do not have an existing harness, Ag Express can help you out. (See page 49.)

Number of Sections to Control	Part Number	List Price
2	CH5002	255.00
4	CH5004	425.00
6	CH5006	595.00
8	CH5008	765.00

Note: When ordering any Switch Box, please specify Type and Manufacturer of Row Clutches, Number of Sections, Switch Box Power Lead and Hitch Lead length needed. (All list prices are including up to 10 ft for each lead, power and hitch.) Custom lengths and modifications are available.

Relay Box Adapters

Overview:

If you have an existing Implement Section Controller, you can adapt it to a variety of applications. i.e. (Half and ¼ width disconnects requiring a heavy current draw, using existing clutch signal to operate liquid section valves without adding a separate controller, or using a liquid section signal to run your clutches.)

Number of Sections to Control	Part Number	List Price
2	AE6502	285.00
4	AE6504	485.00
6	AE6506	685.00
8	AE6508	885.00

Note: Due to the variety of applications the Relay Box can be used for, please specify what equipment you have, and the function/application you wish to use the Relay Box for. (All list prices are including up to 10ft of wire into and out of the Relay Box.) Custom lengths and modifications are available.
